PROJECTS

Customer Churn Analysis & Prediction | Python, SQL, Power BI GitHub

- Built an end-to-end churn analysis pipeline using SQL Server, Power BI, and Python to analyze customer behavior.
- Trained a Random Forest Classifier using Scikit-learn to predict high-risk churners based on contract and usage data.
- Developed interactive dashboards visualizing churn trends, risk profiles, and business metrics across multiple dimensions.

Data Jobs Market Analysis | Power BI, SQL GitHub

- Developed an interactive Power BI dashboard analyzing a dataset of **478K+ global data job postings**.
- Created dynamic DAX measures and KPI cards to track hiring metrics, salary trends, and remote work adoption.
- Implemented multi-criteria slicers and drill-through pages to enable seamless role-wise and location-wise analysis.

Netflix Content Trends Analysis | Python GitHub

- Conducted exploratory data analysis on **6,000+ Netflix titles** using Pandas and NumPy to identify media trends.
- Processed and cleaned metadata involving genres, release years, and content types to handle missing values.
- Visualized content growth trajectories, isolating a significant surge in platform releases post-**2015**.
